Art Unit: 1625

Restriction herein is made on the basis of compounds and methods of use and pharmaceutical compositions will follow the compound group which is elected. In Gps. I-VI, A=O and in VII-XII, X is S. Below v stands for values, aryl for aryl containing and het for heterocyclyl containing.

- I. R1 is aryl v, R2 is arylCO
- II. R1 is aryl v, R2 is hetCO
- III. R1 is aryl v, R2 is cycloalkyl
- IV. R1 is het v, R2 is arylCO
- V. R1 is het v, R2 is ~~het~~CO
- VI. R1 is het v, R2 is is cycloalkyl

Gps. VII-XII track Gps. I-VI with the only difference being that X=S.

The basis for this restriction requirement follows. The furan and thiophenes represent distinct and independent art areas classified in different subclasses in Class 549. The heterocyclyl values of R1 and R6 open up a tremendously broad area of aromatic and non-aromatic compounds distinct and independent from the ones where those variables are aryl containing. For R2 the keto containing values are distinct and independent from the cycloalkyl values.

Because of the many provisos in the claims it is obvious that there is much art which is very close. An example of the complexity of applicants' claims is that the proviso only excludes racemates of specific compounds. This means that for them only the optically pure compounds are included.

Election of a single disclosed species is also required.
